SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience in full-stack web development using the MERN stack. Proficient in building AI-integrated applications, developing React-based interfaces, and working with Node.js backends. Experienced in machine learning, deep learning, and NLP fundamentals. Seeking to apply technical skills in real-world software engineering and AI-driven product development.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning	2023 – 2027
SRKR Engineering College, Bhimavaram	CGPA: 8.9 / 10.0
Higher Secondary Education (HSC), Tirumala Junior College	2023
Percentage: 98.2%	

EXPERIENCE

Full Stack Development Intern – Stikbook Pvt. Ltd., Hyderabad	May 2026 – Present
- Maintaining and enhancing full-stack web features across React.js, Node.js, and MongoDB in a hybrid startup environment, collaborating closely with the engineering team via Notion and Slack. - Contributing to product design workflows and sprint discussions, translating UI mockups into functional components and ensuring consistent user experience across devices. - Engaging in structured code reviews and supervised feature assignments, strengthening proficiency in modern full-stack development practices and startup engineering workflows.	
Web Developer – SRKR Engineering College – CSE Department	2024
- Designed and launched the official ICAAAI international conference website utilizing HTML5, CSS3, and JavaScript, ensuring seamless cross-device usability and improved page responsiveness. - Restructured navigation menus and 10+ UI components using modern web standards, enhancing browsing experience for 180+ international participants attending remotely and onsite.	

PROJECTS

CareerPilot AI – AI-Powered Placement Preparation Platform Tech Stack: MERN Stack, Gemini API, Judge0 API, Tailwind CSS
- Built a full-stack AI-powered placement prep platform combining a job portal, AI roadmap generator, coding practice environment, and mock interview system, developing 5+ reusable React components across the platform. - Engineered an AI Mock Interview module with 3 stages — HR, resume-parsed technical, and live coding round — using camera, microphone, and speech-to-text for a realistic interview simulation. - Integrated Judge0 API for a real-time multi-language compiler and an AI quiz engine generating dynamic MCQs with per-question feedback and final performance scoring.
AirBoard – Smart Last-Call & Navigation System Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB
Architected a smart airport assistance platform with real-time last-call flight alerts and interactive terminal navigation maps, using a Node.js/Express backend with MongoDB for flight data management.

TECHNICAL SKILLS

Languages: C (Fundamentals through Strings), Core Java (OOP Concepts), Python, JavaScript, HTML, CSS, MySQL
Frameworks & Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, Tailwind CSS, Flask
AI / ML: Machine Learning, Deep Learning, NLP (Basics)
Tools & Platforms: GitHub, Jupyter Notebook, Google Colab, Notion, Slack, VS Code, Judge0 API

EXTRA-CURRICULAR ACTIVITIES

Lead Student Coordinator – ICAAAI – CSE Department, SRKR Engineering College	2024
Directed end-to-end coordination of an international academic conference, overseeing scheduling, multi-venue session operations, and cross-functional team communication for 180+ attendees.	
Executive Body Member – Association of Computer Engineers (ACE) Club	2025 – Present
Organized and managed technical workshops and coding events, handling logistics, student outreach, and participation coordination for department-level activities.
